

Methodology Tabs

Congrats! You have finished all the phases!

Along the activity, you practiced using many methodologies that can be at your use in your working processes and generally in project making.

Here are some of the methodologies that you used:

Rapid Peer Learning- Researching a new theme using the the knowledge of the participants in the team, along with learning new fields in a team.

Ideation- A process of raising as many ideas as possible and than choosing the best one.

PBL Project Based Learning- A process in which knowledge is being achieved by making a project, unlike achieving pure knowledge that is not directly connected to practical uses. This way the knowledge is better remembered because of its connection to the uses that can be done with it.

Making Methodology- This methodology stands at the use of the makers movement participants. Using this methodology you can transform ideas into reality, making them into a physical product. The methodology is being used in order to solve many challenges using a physical product.

Presentation of learning (POL)- Using creative and various methods of presenting the learning process and showing the new abilities and knowledge that were learned.
